

# Columbus

Designed performance packaging solutions for high value component protection.

## ASTON MARTIN

### Snapshot

Who are Aston Martin: An iconic marque of unrivalled heritage.

How Columbus helped: Packaging solution for storage and transportation of Head, Tail and Deck Light Units through all stages of manufacture and transport.

Solution: Agile | Bespoke | Competitive costing

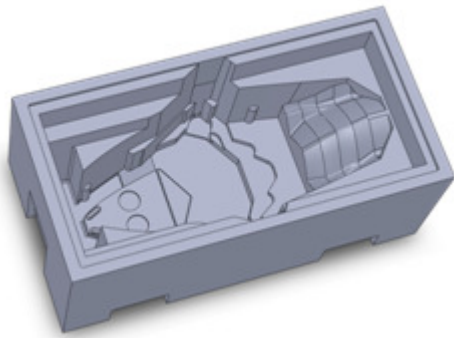

### Summary

Received design brief for:

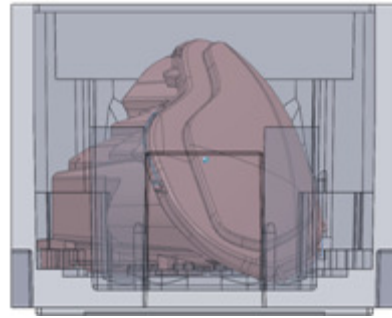

- Closed loop returnable system.
- Each container less than 7kg in weight when loaded with light unit.
- Packaging to be recyclable at the end of its life.

### Solution:

- Made from light weight and durable Expanded Polystyrene (EPS).
- Each tray designed to hold left and right hand light units.
- Material meets the anti-static requirements.
- Each tray has a recess on the top face and the bottom face to allow for easy and safe stacking.
- Drain holes provided in all trays to allow for easy cleaning.
- Lids are available for all containers.
- Label recess provided on all containers.
